If ordered with the table, your ProLuxe™ Skirt is pre-installed and ready for use. Minor adjustments may be required as follows:

**TIGHTEN TABLE SKIRT SUPPORT CORD**

This will need to be done if the skirt is sagging in the middle of the table as shown here.

**STEP 1 - Locate the cord locking clamp.**

The Cord Locking Clamp is located at the motor end of the table.

**STEP 2 - Tighten the cord.**

With one hand, grasp the clamp. With the other hand, grasp the cord. Pull the cord out of the locking groove. Pull cord tight around the table and re-insert the cord into the locking groove.

Check the skirt all around the table. Repeat procedure if additional tightening is required.

**STEP 3 - Adjust the skirt pleats to your desired look.**

Shown here on ProLuxe™ table with ABC system.
TO RE-ATTACH THE PROLUXE SKIRT

If your ProLuxe™ Skirt has not been assembled with the table, or the ProLuxe™ Skirt has been washed, follow the procedure below to re-attach the ProLuxe™ Skirt.

STEP 1 - Locate the panel opposite the cord locking clamp.

CORD LOCKING CLAMP

STEP 2 - Be sure the best face of the skirt is facing out.

STEP 3 - Locate the visible cord at the ends of the panel. (shown above) Insert the cord into the groove of the 2 wood supports located at the end of the table opposite the table motor.

STEP 4 - At the other end of the table (the side with the motor), insert the visible cord at the end of the next skirt panel into the groove of the two wood supports.

STEP 5 - Follow instructions “Tighten Table Skirt Support Cord” (page 1) to tighten & adjust the skirt to your desired look.
TABLE SKIRT CARE INSTRUCTIONS

You may leave the fabric on the cord for easy re-attachment to the table.

- WASH in warm water.
- Do not use bleach.
- DRY on low heat.
- Light iron if necessary.

NOTE: OAKWORKS® is not liable for injuries or damages sustained when table is not used in the manner prescribed.
