PRODUCT USE DESCRIPTION / IMPORTANT SAFETY INSTRUCTIONS

PRODUCT USE DESCRIPTION

The product is a cord connected spa/massage table for commercial use. It is intended for indoor use. Maximum weight capacity of 500 lbs.

The product is intended to be used by trained professionals in a controlled environment. A review of the following Safety Instructions is important for the safety of the operator and patient. Read all instructions and understand this entire user manual before using the product. There are no known contraindications to the use of this equipment.

The table should not be used in any other manner than that described within this manual. Use of any unnecessary force or unauthorized procedures could result in injury to practitioner, client or equipment.

SYMBOL IDENTIFICATION

This symbol, when used in this manual and on product labels, represents a caution warning. Be sure to read and comply with all precautions and warnings.

This symbol, when used in this manual and on product labels, warns against an electrical shock hazard. Be sure to observe and comply with all warnings.

This symbol, when used in this manual or on product labels, indicates a Protective Earth (Ground) Terminal.

This symbol, when used in this manual or on product labels, indicates the date of manufacture of the device.

This symbol, when used in this manual or on product labels, indicates alternating current (AC).

This symbol, when used in this manual or on product labels, indicates direct current (DC).

This symbol is used to indicate that the operator should consult the user manual.

This symbol indicates that when the end-user wishes to discard this product, it must be sent to separate collection facilities for recovery and recycling.

IMPORTANT SAFETY INSTRUCTIONS

CAUTION READ AND SAVE THESE INSTRUCTIONS

The use of accessories, transducers, and cables other than those specified by the manufacturer, may result in increased emissions or decreased immunity of the table.
IMPORTANT SAFETY INSTRUCTIONS

The table is designed to be a stand-alone table. This table must not be modified or incorporated into any other equipment.

As with any moving mechanism there are potential pinch points around and underneath the table. It is the responsibility of the operator of this equipment to ensure that bystanders are not in the area below or around this equipment during operation.

Proper operation of this equipment is very important for the safety of the operator, client, and any other individuals in the area of this equipment. Directions for use of this equipment are described in this manual. The operator should read these sections carefully.

**Weight Limit:** (client and accessories) **500 lbs. (227 kg)** Do not exceed.

Adjustable Breast Comfort (ABC) System Weight Limit - **100 lbs. (45 kg.)** Do not sit on the ABC System. Do not place foreign objects into the ABC System. Only use as intended. **For safety of your client, use a cloth sheet between the ABC System and your client.**

Be certain that the table is completely lowered without any tilt being present prior to discharging an ambulatory client. The client may lose balance and fall.

This table is not suitable for use in the presence of flammable anesthetic mixture with air or oxygen or nitrous oxide.

Do not operate where aerosol (spray) products are being used or where oxygen is being administered.

Do not lift table by the table top. This can damage the table.

When lowering the table, make sure there is nothing underneath the table top that can impede motion (like stools, cabinets, accessory parts, cleaners, etc).

Use this furnishing only for its intended use as described in these instructions. Do not use attachments not recommended by the manufacturer.

Close supervision is necessary when this furnishing is used by, or near children, invalids, or disabled persons.

**WARNING**

To reduce the risk of burns, fire, electric shock or injury to persons:

1. Unplug this furnishing from the electrical outlet before cleaning.
2. Unplug from outlet before adding or removing parts.
3. Never operate this furnishing if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped into water. Contact Oakworks Customer Service before use at 717.235.6807.
4. Keep the cord away from heated surfaces.
5. Never drop or insert any object into any opening.
6. Do not use outdoors.
7. Do not operate where aerosol (spray) products are being used or where oxygen is being administered.

**DANGER**

Risk of electric shock - Connect this furnishing to a properly grounded outlet only. See Grounding Instructions in this manual.

Electrical Shock Hazard - The power supply/control module is located on the lift frame. No user serviceable parts are inside. Refer servicing to qualified personnel. Unplug wall plug prior to contact with any cables connected to the power supply.

Flat Top model shown here with QuickLock™ Face Rest and Boiance™ Crescent
INSTALLATION

The tables come completely assembled and ready to use. Plug the cord into a functioning outlet that is rated for the table. (See Grounding below)

Arrange the power cord and control cords so that they will not create a tripping hazard.

Be sure access to the plug is not blocked for disconnecting the table from power.

GROUNDING

DANGER Risk of Electric Shock - Connect this furnishing to a properly grounded outlet only.

This product must be grounded. If it should malfunction or break down, grounding provides a path of least resistance for electrical current to reduce the risk of electric shock. This product is equipped with a cord having an equipment-grounding conductor and a grounding pin. The pin must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances. See U.S. Sample below.

![Grounding Methods Diagram]

Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or service person if you are in doubt as to whether the product is properly grounded. Do not modify the plug provided with the product - if it will not fit the outlet; have a proper outlet installed by a qualified electrician.
UNIQUE CABINET

TO ACCESS THE STORAGE IN THE UNDER TABLE CABINET:
The table has a fully integrated beautiful wood cabinet and base. The large under-table cabinet provides storage for stacks of towels and other equipment and an in-cabinet plug to accommodate hot towel cabinets and other accessories.

IMPORTANT SAFETY NOTE
The cabinet hood area under the backrest top is not designed for storage or as an area to hold accessories. DO NOT use this area for holding anything. Damage can occur to the table, especially when the pre-set position commands that are accessed by the hand control are activated. Placing anything on this area is prohibiting movement of the backrest and can cause damage to the table or the object. Using this area as storage will void the warranty.
DIRECTIONS FOR USE

TABLE KEYSWITCH

A table keyswitch is located inside the cabinet on the shelf at the head end of the table. This key switch will lock-out the table and prevent all motions. It should be used to prevent unauthorized use. Remove the key if children have the opportunity to access the table without adult supervision.

FOOT CONTROL OPERATIONS - FLAT TOP TABLES ONLY

⚠️ CAUTION ⚠️ When using the table Height Up function, do not place anything between the metal frame and the base structure as damage can occur to the table.

The Flat Top Tables offer height positioning with electronic ease. Operate the foot control as shown below to raise or lower the height of the table.

FOOT CONTROL OPERATION
DIRECTIONS FOR USE

FOOT CONTROL OPERATIONS - ELECTRIC SALON TOP TABLES ONLY

**CAUTION** Do not sit on backrest or footrest sections. The hood area under the backrest top is not designed for storage. DO NOT use this area for holding anything. Damage can occur to the table.

The Electric Salon Top Tables offer backrest, height and footrest positioning with electronic ease. Operate the foot control as shown below to raise or lower the backrest, height or footrest functions of the table.
The OAKWORKS® Adjustable Body Comfort (ABC) System is designed to lower the pressure on breasts and pectoral muscles, allowing the client to relax and create a more comfortable position for their spine. The height of the cushion is easily adjusted up and down in small increments by using the foot control.

**CAUTION**

ABC System Weight Limit - 100 lbs. (45 kg.) Do not place foreign objects into the ABC System. Only use as intended. For safety of your client, use a cloth sheet between the ABC System and your client.
DIRECTIONS FOR USE

HAND CONTROL OPERATIONS - FLAT TOP TABLES ONLY

**CAUTION** When using the table Height Up function, do not place anything between the metal frame and the base structure as damage can occur to the table.

The Flat Top Tables offer height positioning and memory positions with electronic ease. Operate the hand control as shown below to raise or lower the height of the table.

![Hand Control Diagram]

**MEMORY FUNCTION USE**

Use either of the top 2 buttons to orient the table in a favorite position. To store the current position in memory, press the MEM button twice (double click). Two audible beeps will confirm. To recall a stored position, press & hold the MEM button.
DIRECTIONS FOR USE

HAND CONTROL OPERATIONS - ELECTRIC SALON TOP TABLES ONLY

CAUTION

Do not sit on backrest or footrest sections. The hood area under the backrest top is not designed for storage. DO NOT use this area for holding anything. Damage can occur to the table.

The Electric Salon Top Tables offer backrest, height and footrest positioning with electronic ease. Operate the hand control as shown below to raise or lower the backrest, height or footrest functions.

MEMORY FUNCTION USE

Use either of the top 8 buttons to orient the table in a favorite position. To store the current position in memory, press the MEM button twice (double click). Two audible beeps will confirm. To recall a stored position, press & hold the MEM.
The OAWORKS® Adjustable Body Comfort (ABC) System is designed to lower the pressure on breasts and pectoral muscles, allowing the client to relax and create a more comfortable position for their spine. The height of the cushion is easily adjusted up and down in small increments by using the hand control.
DIRECTIONS OF USE

IN CABINET OUTLET

⚠️ DANGER
This product is equipped with an interior 120-volt 60Hz accessory outlet. The total electrical load of equipment plugged into this set of outlets is not to exceed 7 amps or 840 watts. Voltage will be different for other counties.

This product offers an in-cabinet plug to accommodate hot towel cabinets or other accessories. This allows you to store the unit inside with no excess cords to get in the way. With it plugged in, your towels stay warm and within easy reach, yet are still out of the way. You will find the plug inside the cabinet at the head end of the table. Simply plug the warming cabinet in and move any excess cord inside the wooden cabinet.

Note: Appearance of outlets will vary depending on country of use.

LEVELING INSTRUCTIONS

1. Place the table in the location where you plan to use it.

2. Rock the table to determine if it is level with the floor. If the table rocks back and forth at all, the foot that clears the floor when you rock the table will need adjustment.

3. Adjust the Leveler Foot by first loosening the locking nut found just above the rubber Leveler Foot with the 1/2” open-end wrench.

4. Lower the adjustable rubber Leveler Foot until it meets the floor snugly. Tighten the locking nut against the leg of the table with the 1/2” open-end wrench to fix the Leveler Foot in position.

5. Rock the table again to be sure adjustments have stabilized the table. If necessary make any additional adjustments in the same way.
DIRECTIONS FOR USE

MOVING THE TABLE

CAUTION

Before moving the table, disconnect the power cord from the power outlet. Secure the power cord and all hand or foot controls before moving. The table weighs as much as 300 lbs. (136 kg.) Four people are required to move the table safely.

Never lift the table by grasping the table top as the table top is not designed to hold the weight of the base and you could damage the table and the electronics that run the table top.

If you need to move the table, place one person at each corner of the table. We recommend that you have the table top in the up position (with Arm Rests removed) to have the table top ends out of the way as much as possible. Have each person firmly grasp the cabinet base at the bottom by the table legs and lift the table from the base. As when moving any piece of heavy equipment, bend at the knee and lift with your legs beneath you and not with your back. Be aware and use proper, safe procedures for moving a table of this size to prevent injury to yourself or the table. We strongly recommend that a flatbed dolly be used that can hold the entire table if moving the table involves any large distance.

TABLE EXTENDER (ACCESSORY OPTION)

CAUTION:

Do not put excessive weight or pressure on the extender. Excessive pressure can cause premature failure of the Table Extender.

The optional stationary Table Extender provides ultimate comfort for your tallest clients, quickly and easily. The Table Extender comes with two connecting arms that slide into the outlets at the foot end of the tabletop. Slide these fully into the outlets so the Table Extender is flush to the end of the table top. This Stationary Extender provides 11” of additional comfort and support when needed.
DIRECTIONS FOR USE

ADJUSTABLE BREAST COMFORT (ABC) SYSTEM (OPTION)

CAUTION

- ABC System Weight Limit - 100 lbs. (45 kg.) Do not sit on the ABC System.
- Do not place foreign objects into the ABC System. Only use as intended.
- For safety of your client, use a cloth sheet between the ABC System and your client.

The OAKWORKS® Adjustable Breast Comfort (ABC) System is designed to lower the pressure on breasts and pectoral muscles, allowing the client to relax and create a more comfortable position for their spine. The height of the cushion is easily adjusted up and down in small increments by using the hand control. We recommend that the cushion height be adjusted in the following ways:

*Always start with the cushion top level with the top of the table for Prone or Supine Positioning*

In Prone positions, for male or female clients when the face rest is in use, lower the cushion approximately 3/4" at a time (This is approximately 1 second of lowering) and check in with the client regarding their comfort after making the change. Incrementally lower the cushion until the client reports they are comfortable. Sometimes going back up a little will be preferred. This whole process takes no more than 15-20 seconds. After lowering, check headrest position to ensure comfort & support. NOTE: Breast size is not the only determinate of cushion location. Every person’s comfort spot is different, regardless of breast size.

When turning clients over in the supine position, you may use the cushion to level during or after their change of position. It is not important that the cushion be completely level. As in prone positions, make small changes in height and check in with the client.

If you are using the head rest in the Supine position, you may use the cushion at relatively high heights to facilitate stretching for short periods of time. It is not recommended that clients experience this position for more than a few minutes.
DIRECTIONS FOR USE

QuickLock™ FACE REST: (ACCESSORY OPTION)

CAUTION

- Do not put excessive weight or pressure on the Face Rest.
- Excessive pressure can cause premature failure of the Face Rest.
- Do not extend more than 3 inches

Double articulating action provides nearly limitless positioning options with the QuickLock™ Face Rest. The adjustable pad takes pressure off sensitive facial areas while providing superb support. The QuickLock™ Face Rest can be used in both prone and supine positioning and folds out of the way when not in use. Adjustments are made easily by loosening the cam locks, adjusting for height and angle and then locking the cam locks into that position. The table has webbing loops at the head of the table for a variety of uses and outlets at the other end that work as well for additional procedures.

ATTACHING THE QUICKLOCK™ FACE REST:

When attaching the QuickLock™ Face Rest, just slide the frame dowels into the webbing loops or the outlets on the foot end, being sure to keep the 1st cam lock within 3” of the table to ensure a stable connection. The recommended length of dowel bracing against the backrest should be at least 2 inches.

To remove the QuickLock™ Face Rest, just pull the frame from the webbing loops or outlets until it comes free. Set it safely aside or store it inside the under-table cabinet until needed.

TIPS FOR GREAT POSITIONING USING THE QUICKLOCK™ FACE REST:

To use the face rest with your clients supine, rotate the face rest pad so that the thick part of the pad supports your client’s cervical region. Adjusting the height and angle of the face rest gives your clients perfectly comfortable support.

The face pad is flexible so that you can bring the open ends together or spread them apart to achieve the most comfortable support for any size face. To avoid your client’s chin from hitting the spacebar, make sure the pad is narrow enough to support their whole face.

For appropriate cervical flexion, use the cam locks to adjust the downward angle of the face rest, making sure that the surface of the face rest pad at the chin is not lower than the surface of the table.
DIRECTIONS FOR USE

ADJUSTABLE SIDE ARM RESTS (ACCESSORY OPTION - SALON ONLY)

CAUTION:
Do not use the arm rest for client support during the mounting or dismounting of the chair. The arm rest is not designed to support the client’s weight.

TO INSTALL THE ARM RESTS:
The Arm Rests adjust automatically as the back rest moves to remain parallel to the floor.

1. Insert end of arm rest into backrest hole while holding the arm rest at a 60° angle to the backrest.
2. Push end all the way into the hole and drop the arm rest into the horizontal position. Pull outward to make sure the arm rest is secure.

TO LEVEL THE ARM RESTS:
The Arm Rest height is adjusted at the factory for each table. If the armrest starts to sag with repeated use, follow the steps below to readjust.

1. Loosen bottom 2 set screws (turn counter-clockwise).
2. Turn side set screw in (clockwise to raise or counter-clockwise to lower) while lightly raising the arm rest with your other hand (to make the adjustment easier).
3. When you have achieved the desired height, tighten the two bottom set screws (turn clockwise).
DIRECTIONS FOR USE

Boiance Shelf Support: (Accessory Option)

**CAUTION:**
- Boiance Shelf Support Weight Limit - 25 lbs (11.3 kg)
- Do not put excessive weight or pressure on the Boiance Shelf Support.
- Excessive pressure can cause premature failure of Boiance Shelf Support.

Using the Boiance Shelf Support:
The shelf and bracket used together allow you to create the perfect place for clients’ arms. The shelf can also be used alone as a table extender for additional head support.

**Note:** The QuickLock Face Rest is required to use the boiance shelf support system.

To Install the Boiance Shelf Support:
First install the QuickLock Face Rest at the head end of the table.

For Arm Rest Usage:

1. Position bracket underneath QuickLock.
2. Hook bracket onto center support beam on the QuickLock.
3. Lower the bracket down. Make sure bracket is engaged with the dowels on the side of QuickLock.
4. Slide shelf onto bracket. The top track works best for this application.

For Head Support and Table Extender Usage:

1. Remove face rest from QuickLock.
2. Slide QuickLock into the tracks. Top track is best for 4” foam and bottom for 6” foam.
CLEANING & DISINFECTION

RECOMMENDED CLEANERS/DISINFECTANTS

⚠️ DANGER ⚠️ To reduce the risk of electric shock:
- Always unplug this furnishing from the electrical outlet before cleaning.

Reference the Recommended Cleaners and Disinfectant list (MMINML0008-EN) that came with the table. This information can also be found at www.oakworksmed.com under product information.

All cleaners and disinfectants have the ability to degrade the upholstery to some extent. However, following the recommended cleaner and disinfectant list and cleaning process will provide the best care for your table and support a long product life.

OAKWORKS® recommends a prepackaged wipe for cleaners/disinfectants to ensure best distribution of disinfectant for the required kill time, without leaving excess residue and/or overexposing components therefore minimizing the potential for damage to materials. Please read and follow disinfectants manufacturers’ directions for cleaning and disinfection.

OAKWORKS® does NOT recommend the use of cleaners/disinfectants containing Hydrogen Peroxide, Acetic Acid, or Phenolics. These chemicals can cause damage to the appearance and/or material integrity of various components. Also, while the recommended cleaners/disinfectants list includes products containing Quaternary Ammonium compounds (“quats”), not all products containing quats are approved for use. Some contain additional detergents and/or surfactants which can damage some materials.

A note on Bleach: While a 10% sodium hypochlorite (household bleach) solution (EPA No.: 5813-100 or equivalent) can be an effective disinfectant and is dilute enough to be benign to most materials, it alone is not an effective cleaner and a separate product must be used for the initial cleaning steps of the procedure. Because of possible chemical incompatibilities between various cleaning products and bleach, utmost care must be taken by the user to avoid potential exposure to harmful or toxic by-products of the combination. Also, because bleach leaves a potentially corrosive residue as it evaporates, it must be rinsed with clean water after disinfection.

Use of non-approved cleaners or disinfectants may lead to damage to upholstery and other materials found on the table and will void the warranty.

CLEANING PROCESS

Follow the cleaners/disinfectant manufacturers’ directions for use. Please note that cleaning and disinfecting an OAKWORKS® table is a two part process. First it must be cleaned of any visible soil, then it can be disinfected. OAKWORKS® recommends that the table be positioned in the flat position during the cleaning process. Please follow this procedure for best results:

1. Using an approved cleaner or mild liquid soap and water, clean any visible soil off of the table, working from the top to the bottom of the table. It is recommended that the upholstery be cleaned at least once a week to prevent disinfectant build up.
2. Rinse with clean water and dry with a clean cloth or towel.
3. Using an approved disinfectant, thoroughly disinfectant all surfaces of the tabletop and any high-contact areas such as handles, handsets, etc., making sure they remain wet for the disinfectant manufacturer’s recommended contact time. Do not allow disinfectant to pool on the upholstery after the recommended contact time.
4. Wipe off any excess liquid with a cloth or towel and clean water.
5. Dry all surfaces with a clean cloth or towel.

Avoid using writing instruments or other similar instruments around the upholstery as it can cause permanent staining. If this does occur, do not wipe with an alcohol based cleaner. Instead, blot the stain with a clean cloth/ paper towel. Use a 10% bleach dilution to remove the stain. Follow this with a rinse of clean water.
INSPECTIONS / WARRANTY

INSPECTIONS

RECOMMENDED REGULAR INSPECTIONS (monthly or local standard)
• Check for damage to the power, hand control(s) and foot control(s) on all cables.
• Visually inspect components for obvious damage that could cause problems during operation.

RECOMMENDED PERIODIC INSPECTIONS (yearly or local standard)
• Check for damage to the power, hands control and foot control cables and all visible wiring.
• Visually inspect components for obvious damage that could cause problems during operation.
• Check all mechanical functions using the hand control. Repeat using the foot control. Check for abnormal noises.
• Check that all fasteners are present and fastened securely.
• Check table grounding.
• Clean unusual buildup of dirt on the table and/or parts of the table not normally cleaned on a regular basis.
• Check for tears or cracks in the upholstery.
