PRODUCT USE DESCRIPTION

The Lounger offers a zero-gravity curve shape top to provide comfort for relaxation purposes. The Lounger is to be used before, during, and/or after various treatments.

It is intended to be operated by the client and Massage Therapist in a professional environment. No special training is required but a review of the following Safety Instructions is important for the safety of the operator and client. The massage professional should read and understand this entire manual before use with a client. There are no known contraindications to the use of this equipment.

The Lounger should not be used in any other manner than that described within this manual. Use of any unnecessary force or unauthorized procedures could result in injury to practitioner, client or equipment.

SYMBOL IDENTIFICATION

This symbol, when used in this manual and on product labels, represents a caution warning. Be sure to read and comply with all precautions and warnings.

This symbol, when used in this manual and on product labels, warns against an electrical shock hazard. Be sure to observe and comply with all warnings.

This symbol, when used in this manual or on product labels, indicates a Protective Earth (Ground) Terminal.

This symbol, when used in this manual or on product labels, indicates the date of manufacture of the device.

This symbol, when used in this manual or on product labels, indicates alternating current (AC).

This symbol, when used in this manual or on product labels, indicates direct current (DC).

This symbol is used to indicate that the operator should consult the user manual.
The use of accessories, transducers, and cables other than those specified by the manufacturer, may result in increased emissions or decreased immunity of the product.

The Lounger is designed to be a stand-alone product. The Lounger must not be modified or incorporated into any other equipment.

Proper operation of this equipment is very important for the safety of the operator, client, and any other individuals in the area of this equipment. Directions for use of this equipment are described in this manual. The operator should read these sections carefully.

Weight Limit: (client and accessories) 500 lbs. (227 kg) Do not exceed.

This product is not suitable for use in the presence of flammable anesthetic mixture with air or oxygen or nitrous oxide.

Do not operate where aerosol (spray) products are being used or where oxygen is being administered.

Do not lift by the table top. This can damage the product.

Use this furnishing only for its intended use as described in these instructions. Do not use attachments not recommended by the manufacturer.

Close supervision is necessary when this furnishing is used by, or near children, invalids, or disabled persons.

**WARNING**

To reduce the risk of burns, fire, electric shock or injury to persons:

1. Unplug this furnishing from the electrical outlet before cleaning.
2. Unplug from outlet before adding or removing parts.
3. Never operate this furnishing if it has a damaged cord or plug, if it is not working properly, if it has been dropped or damaged, or dropped into water. Contact Oakworks Customer Service before use at 717.235.6807.
4. Keep the cord away from heated surfaces.
5. Never drop or insert any object into any opening.
6. Do not use outdoors.
7. Do not operate where aerosol (spray) products are being used or where oxygen is being administered.

**DANGER**

Risk of electric shock - Connect this furnishing to a properly grounded outlet only. See Grounding Instructions in this manual.

Electrical Shock Hazard - No user serviceable parts are inside. Refer servicing to qualified personnel. Unplug wall plug prior to contact with any cables connected to the power supply.

- Seat Height: 18“ (46 cm.)
- Voltage Options: None or 120V/60Hz - 230V/50Hz
- Weight Capacity: 500 lbs. (227 kg.) (client and accessories)
- Width: 31” (79 cm.)
- Pad Length: 75” (109.5 cm.)
- Table Length: 69” (175 cm.)
- Padding: 4” (10 cm.)
- Weight: 125 lbs. (57 kg.)
- Accessory: Adjustable Neck Pillow
The Lounger comes completely assembled and ready to use. Plug the cord into a functioning outlet that is rated for the Lounger if applicable. (See Grounding below)

Arrange the power cord so that they will not create a tripping hazard.

Be sure access to plug is not blocked for disconnecting the Lounger from power.

**GROUNDING**

**DANGER** Risk of Electric Shock - Connect this furnishing to a properly grounded outlet only.

This product must be grounded. If it should malfunction or break down, grounding provides a path of least resistance for electrical current to reduce the risk of electric shock. This product is equipped with a cord having an equipment-grounding conductor and a grounding pin. The pin must be plugged into an appropriate outlet that is properly installed and grounded in accordance with all local codes and ordinances. See U.S. Sample below.

Improper connection of the equipment-grounding conductor can result in a risk of electric shock. Check with a qualified electrician or service person if you are in doubt as to whether the product is properly grounded. Do not modify the plug provided with the product - if it will not fit the outlet; have a proper outlet installed by a qualified electrician.
INSTALLATION

MOVING THE LOUNGER

Before moving the Lounger, disconnect the power cord from the power outlet. Secure the power cord before moving. The product weighs as much as 125 lbs. (57 kg.) Two people are required to move the Lounger safely. Do not use the Lounger to transport a client.

When moving the Lounger, place one person at the head end and the other person at the foot end. Have each person firmly grasp the base. When moving any piece of heavy equipment, bend at the knee and lift with your legs and not with your back. Be aware and use proper, safe procedures for moving a Lounger of this size to prevent injury to yourself or damage to the Lounger. We strongly recommend that a flatbed dolly that can hold the entire product be used if moving the Lounger involves any large distance.

LEVELING INSTRUCTIONS

1. Place the Lounger in the location where you plan to use it.

2. Rock the Lounger to determine if it is level with the floor. If the Lounger rocks back and forth at all, the foot that clears the floor when you rock the Lounger will need adjustment.

3. Adjust the Leveler Foot by turning it counterclockwise to loosen.

4. Lower the adjustable rubber Leveler Foot until it meets the floor snugly.

5. Rock the Lounger again to be sure adjustments have stabilized the Lounger. If necessary make any additional adjustments in the same way.
DIRECTIONS FOR USE

REMOVING TOP PAD

The top pad has been designed to be easily removable and replaceable with no tools needed.

TO REMOVE THE TOP PAD:
The top pad is attached to the platform with 8 thumb screws located below the platform as shown.

1. Unscrew the thumb screw clockwise until the thumb screw is completely removed. Repeat for all 8 thumb screws. If the thumbs screws are on too tight, a 3/16” hex bit can be used.

2. Lift top pad off the platform.

IF THE LOUNGER HAS A HEATED TOP:
Unplug the Lounger from the wall outlet and disconnect the wires circled from the control boxes located under the platform. The control boxes are accessible by lifting up the pad slightly on the backrest. Once disconnected, the top can be fully removed.
DIRECTIONS FOR USE

PULL OUT SHELF (OPTION)

The Lounger has an optional pull out shelf that can be pulled out either to the left, right, or stay in a neutral position in the middle to be out of the way. The shelf is perfect for beverages, refreshments, reading material and more.

OPERATING PULL OUT SHELF:
To operate the pull out shelf, pull or push the shelf in the desired direction. There is a stop to prevent the shelf from being pulled out more than the maximum distance.
DIRECTIONS FOR USE

INTEGRATED HEATED TOP (OPTION)

USING THE INTEGRATED HEATED TOP:
The Lounger comes with the option for a fully integrated dual zone heated top pad. Simply press the heating indicator(s) located on the right side to the desired heat level. The heat can reach up to 40°C (105°F) and has an 8 hour automatic shutoff timer.

Integrated heat level indicator

Zone 1 controls the upper half of the pad, while Zone 2 controls the lower half of the pad. Press both buttons located on the right side of the Lounger to turn on both zones and heat the entire top.

BLINKING LIGHTS:
If one or both controllers’ heat level indicator lights are blinking, the heating elements are not connected properly and/or damaged. Unplug the Lounger and locate the control box(es) inside the base under the table top. Disconnect the heating element connectors from the control box and reconnect. Plug the power cord back into the wall outlet. Call Customer Service at 717.235.6807 if problem continues.
DIRECTIONS FOR USE

LED ACCENT LIGHTING (OPTION)

USING THE LED LIGHTING:
The Lounger has optional LED lighting installed for ultimate customization. Use the remote to change the colors, brightness, speed, and more. The remote works with RF waves, therefore, the client can use the remote anywhere throughout the room. See below for instructions on how to use the remote.

LED REMOTE HOLDER:
The Lounger comes with a LED Remote Holder that can be attached to the table if wanted. Use a #2 Philips screwdriver and the screws provided to mount the remote holder in the desired location. A 3/32 pilot hole can be drilled first prior to installing the screws.
CLEANING & DISINFECTION

RECOMMENDED CLEANERS/DISINFECTANTS

DANGER  To reduce the risk of electric shock:
- Always unplug this furnishing from the electrical outlet before cleaning.

Reference the Recommended Cleaners and Disinfectant list (MMINML0008-EN) that came with the product. This information can also be found at www.shop.spatables.com under product information.

All cleaners and disinfectants have the ability to degrade the upholstery to some extent. However, following the recommended cleaner and disinfectant list and cleaning process will provide the best care for your product and support a long product life.

OAKWORKS® recommends a prepackaged wipe for cleaners/disinfectants to ensure best distribution of disinfectant for the required kill time, without leaving excess residue and/or overexposing components therefore minimizing the potential for damage to materials. Please read and follow disinfectants manufacturers’ directions for cleaning and disinfection.

OAKWORKS® does NOT recommend the use of cleaners/disinfectants containing Hydrogen Peroxide, Acetic Acid, or Phenolics. These chemicals can cause damage to the appearance and/or material integrity of various components. Also, while the recommended cleaners/disinfectants list includes products containing Quaternary Ammonium compounds (“quats”), not all products containing quats are approved for use. Some contain additional detergents and/or surfactants which can damage some materials.

A note on Bleach: While a 10% sodium hypochlorite (household bleach) solution (EPA No.: 5813-100 or equivalent) can be an effective disinfectant and is dilute enough to be benign to most materials, it alone is not an effective cleaner and a separate product must be used for the initial cleaning steps of the procedure. Because of possible chemical incompatibilities between various cleaning products and bleach, utmost care must be taken by the user to avoid potential exposure to harmful or toxic by-products of the combination. Also, because bleach leaves a potentially corrosive residue as it evaporates, it must be rinsed with clean water after disinfection.

Use of non-approved cleaners or disinfectants may lead to damage to upholstery and other materials found on the product and will void the warranty.

CLEANING PROCESS

Follow the cleaners/disinfectant manufacturers’ directions for use. Please note that cleaning and disinfecting an OAKWORKS® product is a two part process. First it must be cleaned of any visible soil, then it can be disinfected. OAKWORKS® recommends that the product be positioned in the flat position during the cleaning process. Please follow this procedure for best results:

1. Using an approved cleaner or mild liquid soap and water, clean any visible soil off of the product, working from the top to the bottom of the product. It is recommended that the upholstery be cleaned at least once a week to prevent disinfectant build up.
2. Rinse with clean water and dry with a clean cloth or towel.
3. Using an approved disinfectant, thoroughly disinfect all surfaces of the tabletop and any high-contact areas such as handles, handsets, etc., making sure they remain wet for the disinfectant manufacturer’s recommended contact time. Do not allow disinfectant to pool on the upholstery after the recommended contact time.
4. Wipe off any excess liquid with a cloth or towel and clean water.
5. Dry all surfaces with a clean cloth or towel.

Avoid using writing instruments or other similar instruments around the upholstery as it can cause permanent staining. If this does occur, do not wipe with an alcohol based cleaner. Instead, blot the stain with a clean cloth/paper towel. Use a 10% bleach dilution to remove the stain. Follow this with a rinse of clean water.
The model number and serial numbers are located underneath the top pad. Remove bottom two thumb screws and lift up the pad.

Model and Serial numbers always start with a letter.
INSPECTIONS / WARRANTY/ SPECIFICATIONS

INSPECTIONS

RECOMMENDED REGULAR INSPECTIONS (monthly or local standard)
  • Check for damage to the power cables on all cables.
  • Visually inspect components for obvious damage that could cause problems during operation.

RECOMMENDED PERIODIC INSPECTIONS (yearly or local standard)
  • Check for damage to the power cables and all visible wiring.
  • Visually inspect components for obvious damage that could cause problems during operation.
  • Check that all fasteners are present and fastened securely.
  • Check grounding.
  • Clean unusual buildup of dirt on the product and/or parts of the product not normally cleaned on a regular basis.
  • Check for tears or cracks in the upholstery.

WARRANTY

View complete warranty details at www.shop.spatables.com under the Information tab “Warranty and Return Policy”.
