All warranties are limited to factory-provided replacement parts, factory repair or replacement, at the discretion of OAKWORKS®.

All warranties exclude damage caused by improper set-up, accident, abuse, misuse, neglect, use for other than intended purpose or reasonable wear such as tears in the upholstery.

All warranties are invalidated by non-factory modifications and unauthorized repairs, which will immediately terminate all liability by OAKWORKS® for the product or damages caused by its use.

The buyer and its customers shall be responsible for proper set-up and use of the products as well as any supervision required for safety. In no event shall OAKWORKS® be liable for any special, indirect, consequential, incidental, exemplary or punitive damages or costs. Use of non-approved cleaning solutions voids the guarantee on all fabrics.

The warranties set forth herein are the sole and exclusive warranties provided by OAKWORKS®. There are no other warranties, representations or guarantees provided by OAKWORKS® either expressed or implied, including warranties of merchantability and fitness for a particular purpose.

Warranty valid with proof of purchase.

### WARNING / SYMBOL IDENTIFICATION

This symbol, when used in this manual and on product labels, represents a caution warning. Be sure to read and comply with all precautions and warnings.

This symbol, when used in this manual and on product labels, warns against an electrical shock hazard. Be sure to observe and comply with all warnings.

This symbol, when used in this manual or on product labels, indicates a Protective Earth (Ground) Terminal.

This symbol, when used in this manual or on product labels, indicates that during transport there should be no stacking of containers.

This symbol, when used in this manual or on product labels, indicates that the product should be protected from moisture. The humidity specifications for Transport & Storage are listed on page 26.

This symbol, when used in this manual or on product labels, indicates that information is given regarding the recommended temperature limits during transport and storing.

This symbol, when used in this manual or on product labels, indicates the date of manufacture of the device.

This symbol, when used in this manual or on product labels, indicates alternating current (AC).

This symbol, when used in this manual or on product labels, indicates direct current (DC).

This symbol, when used in this manual or on product labels, indicates that instructional information is included. It should be read carefully and completely.

**CARE & CLEANING**

*HOW TO CARE FOR YOUR UPHOLSTERY:*

In order to maintain the quality and ensure the life of the *Celesta Maxx*®, here are some preventative steps that can be taken to protect the upholstery on the chair and accessories.

- **Protect your Celesta Maxx**® and accessories with sheets and fleeces. We offer both fitted sheets and thick fleeces that protect your upholstery fabric against oil stains while offering comfortable 100% cotton flannel softness to your clients. You can also preserve your face rest and bolsters with 100% cotton flannel covers and fleeces.

- **Clean your upholstered items only when needed with a mild detergent or Green Windex.** A diluted 1/100 bleach solution for disinfecting can be used. Dry the table immediately after cleaning to remove excess cleaning solution. Using strong cleaners, such as alcohol, acetone, higher concentrations of bleach or other products that contain high concentrations of these substances, can shorten the life of your fabric, or discolor it. **Note:** Damage caused by them will not be covered under the warranty.

- **Avoid extremes in heat.** Very cold temperatures can make your fabric prone to cracking. Very high temperatures can cause the fabric to stretch permanently.

- **Avoid exposing your products to direct sunlight for extended periods of time.** This can lead to fading and cracking of the fabric.

- **Use an anti-slip pad to prevent oil from reaching the upholstery and to keep your sheets from slipping.**

Caring for your *Celesta Maxx*® upholstery fabric involves more than just protecting it from general abrasions, cuts and punctures. We offer most of the products mentioned above in our therapeutic equipment catalog. The cushions on the *Celesta Maxx*® can be replaced but you can lengthen the life of the upholstery fabric on your hybrid lift by following these quick and easy suggestions.

**GENERAL CARE OF EQUIPMENT COMPONENTS:**

- **Use only a mild solution of 4:1 diluted non-alcohol cleaner such as 409®, Fantastik® or some other non-abrasive cleaner to wipe down the metal and wooden surfaces of the chair.** Apply with a damp (not wet) lint-free cloth. Be sure excess liquid does not drip onto, or into, any of the electrical controls or mechanisms. Be sure that the unit is unplugged before cleaning these areas. Wipe these areas carefully with a lint-free cloth.

- **The electronic powering mechanism of your Celesta Maxx**® requires no general maintenance or lubrication.

- **The wooden portions of the equipment can be polished with any polish approved for wooden surfaces.** Spray, or pour, the polish onto a soft cloth and be careful not to get it onto other surfaces.
**PRODUCT DESCRIPTION**

*Celesta Maxx™ - Model P3CTMPMX*

**Total Lifting Capacity:** 625 lbs.

- Smooth and quiet height adjustments with the touch of a button accommodates practitioners and estheticians of all size
- Electronically adjustable top, controlled by a multifunctional hand control, allows you to effortlessly change your clients position while they relax on the hybrid lift chair
- Four maintenance-free motors power the electric lift and tilt mechanisms
- Powered back rest and leg rest make adjustments easy when a client is on the table
- Head end access panel allows the seated practitioner total ergonomic access to the client’s head region, reducing strain and fatigue
- Tilting feature allows you to position the client precisely for stress-free work and supports the clients’ special needs; such as cardio-vascular, respiratory, edema, pregnancy or sinus concerns
- Base construction of Northern Hard Maple

**TROUBLESHOOTING**

- **Foot Controls**

13. Carefully replace the shelf back onto the base, slipping in into the sideboards. A little side-to-side movement of the shelf will help adhere the two-part velcro firmly back together. Be sure to pull up the slack on the cords at both ends of the shelf as you drop it into place, carefully pulling them through the exit holes.

14. The grommets need to be replaced on both cords. To replace the grommet on the hand control cord, pull the cord out as far as possible (without placing undue strain on the cord) and slip the cord into the groove on the grommet. Then snap it into place in the exit hole.

15. To replace the grommet on the Actuator Cord assembly, hold one end of the 2-piece grommet against the Actuator Cord Assembly and then slide the other piece around the cord assembly and into the grooves in the first grommet so the two parts connect around the cord assembly. Then carefully slide the grommet down and snap it into place in the exit hole. Connect the power and test the control.

**CAUTION**

Before doing any work on the unit, disconnect the power cord from the power outlet.

**OTHER REPAIRS**

There are no other in-the-field servicable parts on the Celesta Maxx™. For all other questions, technical assistance or to make arrangements for other repairs, please contact Customer Service at 800-558-8850 (within PA call 717-796-6807).
TROUBLESHOOTING

• Foot Controls (cont)

Take the second wooden block and repeat this on the opposite end of the unit so the side you are working on is propped up enough to slide the cord and plug under the base.

10. Unplug the old cord; remove it from under the base. Slide the plug of the new foot control under the base and plug it into the receptacle on the junction box. With the assistance of two people, safely tilt the unit enough to remove the two wood blocks used to prop the side of the unit. Set the Celesta MaXX™ back down on the floor.

11. Replace the retaining clip on the new plug, making sure that it snaps into the groove in the receptacle.

12. Line up the junction box with the screw that is still in the sideboard and slide it onto the screw. Using the screw you had previously removed, re-attach the junction box to the sideboard at the other end of the junction box, making sure all cords are safely out of the way.

PRODUCT DESCRIPTION

Celesta MaXX™
- Model P3CTMPMX

Table Specs*:  

- Height: 24" - 32"
- Width: 29"
- Length: 72"
- Lift Capacity: 625 lbs.
- Weight: 300 lbs.
- Top: Electronically Controlled Celesta MaXX™ Easy Access Top Includes QuickLock™ Face Rest, Auto-Adjusting Removable Arm Rests, Head Rest Pillow & 4 Pre-set positions
- Padding: AeroCel™ System
- Upholstery: UltraTouch™ II (standard) & TerraTouch™

For electrical specs, see Specifications Chart, pg 26.
INSTALLATION

Leveling Instructions

The Celesta Maxx™ comes completely assembled and ready to use. Plug the cord into a functioning outlet that is rated for the table. Arrange the power cord and control cords so that they will not create a tripping hazard and where the controllers are located to you liking and are conveniently accessible.

LEVELING INSTRUCTIONS:

If Table Will Not Sit Flat on the Floor:
The Celesta Maxx™ is equipped with Leveler Feet that adjust to level the table on uneven floors. To adjust the Leveler Feet to suit common floor differences you will need to use a 1/2” open-end wrench or an adjustable wrench.

1/2” Open-end Wrench

Leveler Foot

NOTE:
The new electronic component will be reinstalled in the same manner as the old one. When assembling please take note of the order, installation method and placement of plugs as the new unit will be re-assembled in the same way.

IMPORTANT

When operating the Celesta Maxx™ controls be sure to observe all cautions and warnings given in the manual to prevent injury to both operator and client.

TROUBLESHOOTING

Foot Control Replacement Instructions

To Replace a Foot Control, follow these steps:

1. Determine the fault, checking all the points listed on page 16. Once this is determined that the foot control needs replacing, call Customer Service to obtain the new control. (see Parts List, pg 27)

2. It is recommended that the unit be raised to it’s highest level for ease of access to the base.

3. Disconnect the table’s power cord from your power outlet before proceeding.

To access the junction box and replace the Foot Control, follow the same instructions as replacing the Hand control from Step 4 through Step 7 on pages 17-18.

8. The plug for the foot control connects into the junction box on either side of the main electrical connection in the center of the junction box. The black cord will be in the center two outlets. Once you have determined this, remove the retaining clip on the plug to be replaced. Do this by placing pressure on the clip end with your screw driver; it should then pop up. Set it aside for later.

9. The cord on the foot control enters the base from underneath so it will be necessary to prop the base up in order to remove the old cord and then install the new one. Take one of the two wooden blocks supplied with your new Foot Control, and with the assistance of two people tilt the Celesta Maxx™ just enough to slide the block under the foot of the unit. Rest the base on this block.
13. The grommets need to be replaced on both cords. To replace the grommet on the hand control cord, pull the cord out as far as possible (without placing undue strain on the cord) and slip the cord into the groove on the grommet. Then snap it into place in the exit hole.

14. To replace the grommet on the Actuator Cord assembly, hold one end of the 2-piece grommet against the Actuator Cord Assembly and then slide the other piece around the cord assembly and into the grooves in the other piece so the two parts connect around the cord assembly. Then carefully slide the grommet down and snap it into place in the exit hole. Connect the power and test the control.

FOOT CONTROL REPLACEMENT INSTRUCTIONS

Replacement of the Foot Control may be necessary if it does not actuate the functions of raising or lowering the height of the *Celesta Maxx*™.

**CAUTION**

When operating the *Celesta Maxx*™ controls and making any and all adjustments to the table, move hands and feet away from the working mechanism of the table.

Children must be supervised when around this equipment by a responsible adult.

Hand Control: 12 positioning Buttons

The *Celesta Maxx*™ operates all the positioning and tilt functions available with the *Celesta Maxx*™ at the touch of a button. The top eight buttons operate the customizable positioning of the backrest, seat and leg rest of the top while the bottom four buttons operate the pre-set positions of the chair. Follow the directions on the next two pages to access these functions.
DIRECTIONS FOR USE

Celesta Maxx™

• Hand Control

HAND CONTROL OPERATIONS • Celesta Maxx™

CAUTION

Do not sit on the elevated Back Rest or Leg Rest.

CAUTION

When operating the Celesta Maxx™ controls and making any and all adjustments to the table, move hands and feet away from the working mechanism of the table.

CAUTION

Children must be supervised when around this equipment by a responsible adult.

Press and hold the appropriate button until the position desired is achieved and then release. When accessing controls 3 & 4, the leg position will move in tandem with the seat and maintain the angle of original setting. The Armrests can be removed or adjusted to provide the most in comfort and ergonomics. (see pgs 9-11).

CAUTION

Before doing any work on the unit disconnect the power cord from the power outlet.

NOTE:

The new electronic component will be reinstalled in the same manner as the old one. When assembling please take note of the order, installation method and placement of plugs as the new unit will be re-assembled in the same way.

IMPORTANT

The table weighs as much as 300 lbs. DO NOT lift or move the unit without using proper safety procedures or equipment. DO NOT turn the Celesta Maxx™ on its side for any reason. To do so could cause damage to the base and will void the warranty. There are no serviceable items that need this action.

TROUBLESHOOTING

• Hand Control Replacement Instructions

8. The Hand Control Plug is the light grey one at the end of the junction box. The plug is secured in place by a retainer clip which must be removed before the plug can be removed. The clip can easily be removed by placing pressure on the clip end with your screw driver (shown here on the Foot Control plug): it should then pop up. Place the retainer clip aside.

9. Remove old plug and cord, noting as you remove it how the cord is placed among the controls in the interior of the base as the new cord will need to be placed in the same manner. Be sure when replacing the old cord with the new that the cord goes under the metal control box mounting bracket. This is necessary to protect the cord and to allow the shelf to lay flat.

10. Thread the new cord through the exit hole in the upraised shelf. Pull the cord under the mounting bracket and plug the new cord into the receptacle in the junction box. Replace the retaining clip, making sure that it snaps into the groove in the receptacle.

11. Line up the junction box with the screw that is still in the side board and slide it onto the screw. Using the screw you had previously removed, reattach the junction box to the sideboard making sure all cords are safely out of the way.

12. Carefully replace the shelf back onto the base, slipping in into the sideboards. A little side-to-side movement of the shelf will help adhere the two-part velcro firmly back together. Be sure to pull up the slack on the cords at both ends of the shelf as you drop it into place, carefully pulling them through the exit holes.

CAUTION

Before doing any work on the unit disconnect the power cord from the power outlet.

NOTE:

The new electronic component will be reinstalled in the same manner as the old one. When dissembling please take note of the order, installation method and placement of plugs as the new unit will be re-assembled in the same way.

Before doing any work on the unit disconnect the power cord from the power outlet.

NOTE:

The new electronic component will be reinstalled in the same manner as the old one. When dissembling please take note of the order, installation method and placement of plugs as the new unit will be re-assembled in the same way.

CAUTION

The table weighs as much as 300 lbs. DO NOT lift or move the unit without using proper safety procedures or equipment. DO NOT turn the Celesta Maxx™ on its side for any reason. To do so could cause damage to the base and will void the warranty. There are no serviceable items that need this action.

TROUBLESHOOTING • Hand Control Replacement Instructions

Retainer Clip End

8. The Hand Control Plug is the light grey one at the end of the junction box. The plug is secured in place by a retainer clip which must be removed before the plug can be removed. The clip can easily be removed by placing pressure on the clip end with your screw driver (shown here on the Foot Control plug): it should then pop up. Place the retainer clip aside.

9. Remove old plug and cord, noting as you remove it how the cord is placed among the controls in the interior of the base as the new cord will need to be placed in the same manner. Be sure when replacing the old cord with the new that the cord goes under the metal control box mounting bracket. This is necessary to protect the cord and to allow the shelf to lay flat.

10. Thread the new cord through the exit hole in the upraised shelf. Pull the cord under the mounting bracket and plug the new cord into the receptacle in the junction box. Replace the retaining clip, making sure that it snaps into the groove in the receptacle.

11. Line up the junction box with the screw that is still in the side board and slide it onto the screw. Using the screw you had previously removed, reattach the junction box to the sideboard making sure all cords are safely out of the way.

12. Carefully replace the shelf back onto the base, slipping in into the sideboards. A little side-to-side movement of the shelf will help adhere the two-part velcro firmly back together. Be sure to pull up the slack on the cords at both ends of the shelf as you drop it into place, carefully pulling them through the exit holes.

CAUTION

The table weighs as much as 300 lbs. DO NOT lift or move the unit without using proper safety procedures or equipment. DO NOT turn the Celesta Maxx™ on its side for any reason. To do so could cause damage to the base and will void the warranty. There are no serviceable items that need this action.

TROUBLESHOOTING • Hand Control Replacement Instructions

Retainer Clip End

8. The Hand Control Plug is the light grey one at the end of the junction box. The plug is secured in place by a retainer clip which must be removed before the plug can be removed. The clip can easily be removed by placing pressure on the clip end with your screw driver (shown here on the Foot Control plug): it should then pop up. Place the retainer clip aside.

9. Remove old plug and cord, noting as you remove it how the cord is placed among the controls in the interior of the base as the new cord will need to be placed in the same manner. Be sure when replacing the old cord with the new that the cord goes under the metal control box mounting bracket. This is necessary to protect the cord and to allow the shelf to lay flat.

10. Thread the new cord through the exit hole in the upraised shelf. Pull the cord under the mounting bracket and plug the new cord into the receptacle in the junction box. Replace the retaining clip, making sure that it snaps into the groove in the receptacle.

11. Line up the junction box with the screw that is still in the side board and slide it onto the screw. Using the screw you had previously removed, reattach the junction box to the sideboard making sure all cords are safely out of the way.

12. Carefully replace the shelf back onto the base, slipping in into the sideboards. A little side-to-side movement of the shelf will help adhere the two-part velcro firmly back together. Be sure to pull up the slack on the cords at both ends of the shelf as you drop it into place, carefully pulling them through the exit holes.

CAUTION

The table weighs as much as 300 lbs. DO NOT lift or move the unit without using proper safety procedures or equipment. DO NOT turn the Celesta Maxx™ on its side for any reason. To do so could cause damage to the base and will void the warranty. There are no serviceable items that need this action.
5. Place a finger into the hole for the hand rest control (or use a tool like an Allen Wrench to catch the shelf) and firmly lift the shelf. Both ends will lift free of the base. Brace the hand control end against the ridge on the tower. The shelf will be at an approximate 45° angle to the opposite tower.

6. Follow the coil cord of the hand control to the left side of the base where you will see the junction box where the cords plug into the unit. Using a Phillips Head screwdriver, unscrew the first screw that holds the junction box to the sideboard. The light grey cord of the Hand Control plugs in at this end.

7. After removing the screw and placing it aside, slide the junction box out and away from the sideboard, carefully lifting it over the edge of the sideboard to rest it against the outside of the base.

TROUBLESHOOTING

• Hand Control (cont)

CAUTION
Before doing any work on the unit, disconnect the power cord from the power outlet.

IMPORTANT

CAUTION
Be careful to allow for slack in the power cords as you pull the junction box out and over the sideboard.

CAUTION
Do not leave clients unattended when table is tilted near its limits.

DIRECTIONS FOR USE

Celesta Maxx™

• Hand Control

CAUTION
When operating the Celesta Maxx controls and making any and all adjustments to the table, move hands and feet away from the working mechanism of the table.

CAUTION
Children must be supervised when around this equipment by a responsible adult.

HAND CONTROL OPERATIONS • Celesta Maxx™

Press and hold the appropriate button until the position desired is achieved and then release. When accessing controls 7 & 8, the position and angle of original setting will be maintained and just the tilt position will change. The Armrests can be removed or adjusted to provide the most in comfort and ergonomics. (see pgs 9-11).
DIRECTIONS FOR USE

Celesta Maxx™
• Hand Control

HAND CONTROL OPERATIONS • Celesta Maxx™

Pre-set Auto-Positions

Position 1 Control:
- pre-set sitting position

Position 2 Control:
- pre-set flex position

Position 3 Control:
- pre-set reclined flex position

Position 4 Control:
- pre-set “flat” position

Press and hold the appropriate button until the unit stops moving and has settled into desired position. Release button. The Armrests can be removed or adjusted to provide the most in comfort and ergonomics. (see pgs 9-11).

CAUTION
Do not sit on the elevated Back Rest or Leg Rest.

CAUTION
When operating the Celesta Maxx™ controls and making any and all adjustments to the table, move hands and feet away from the working mechanism of the table.

CAUTION
Children must be supervised when around this equipment by a responsible adult.

TROUBLESHOOTING

• Hand Control Replacement Instructions

4. To access the junction box to disconnect the hand control you must first lift the plywood shelf that covers the base assembly. The shelf is attached by a two-part velcro that will separate from the base with an upward pull.
To enable you to pull on the base shelf, first remove the two plastic grommets that secure the cords and are found at each end of the base.

NOTE:
The new electronic component will be reinstalled in the same manner as the old one. When assembling please take note of the order, installation method and placement of plugs as the new unit will be reassembled in the same way.

CAUTION

The table weighs as much as 300 lbs. DO NOT lift or move the unit without using proper safety procedures or equipment. DO NOT turn the Celesta Maxx™ on its side for any reason. To do so could cause damage to the base and will void the warranty. There are no servicable items that need this action.

CAUTION

Before doing any work on the unit, disconnect the power cord from the power outlet.

IMPORTANT

DO NOT turn the Celesta Maxx™ on its side for any reason.

To remove the Actuator Cords grommet, first raise the security clip to its highest level. It will slide up the tower easily. Then grasp the plastic grommet, lift it up and out. Once removed it will be in two pieces. These 2 (two) pieces slip together to snugly hold the cords in place. Set these aside.

Pull up on the hand control’s coil cord to enable you to grasp the grommet and lift it out. It will come out easily in one piece. Set the grommet aside.

NOTE:

The new electronic component will be reinstalled in the same manner as the old one. When dissembling please take note of the order, installation method and placement of plugs as the new unit will be reassembled in the same way.

CAUTION

The table weighs as much as 300 lbs.

DO NOT

lift or move the unit without using proper safety procedures or equipment.

DO NOT

turn the Celesta Maxx™ on its side for any reason.

To do so could cause damage to the base and will void the warranty. There are no servicable items that need this action.

CAUTION

Before doing any work on the unit, disconnect the power cord from the power outlet.

IMPORTANT

CAUTION

Before doing any work on the unit, disconnect the power cord from the power outlet.

NOTE:

The new electronic component will be reinstalled in the same manner as the old one. When dissembling please take note of the order, installation method and placement of plugs as the new unit will be reassembled in the same way.

CAUTION

The table weighs as much as 300 lbs.

DO NOT

lift or move the unit without using proper safety procedures or equipment.

DO NOT

turn the Celesta Maxx™ on its side for any reason.

To do so could cause damage to the base and will void the warranty. There are no servicable items that need this action.

CAUTION

Before doing any work on the unit, disconnect the power cord from the power outlet.

IMPORTANT

CAUTION

Before doing any work on the unit, disconnect the power cord from the power outlet.

To do so could cause damage to the base and will void the warranty. There are no servicable items that need this action.

CAUTION

Before doing any work on the unit, disconnect the power cord from the power outlet.
TROUBLESHOOTING

IF THE Celesta Maxx™ TOl WILL NOT CHANGE HEIGHT OR POSITION:

• Check the outlet to be sure that it has power and that the power cable is plugged in. Try the Foot Control and Hand Control to see if any work. If any work, then possibly there is a loose connection or a faulty controller.

• Unplug the power cable from the wall outlet.

• Make sure that all male and female connectors are firmly pushed into each other. Even a slight misconnection can cause a possible malfunction.

• Plug the unit back into the wall and check the controls again. If none work, then proceed to the next step. If one or more of the controls work, then proceed to the section describing the replacement of the needed control, after receiving replacement for the inoperative control.

HAND CONTROL REPLACEMENT INSTRUCTIONS

Replacement of the Hand Control may be necessary if the Hand Control does not actuate the functions of tilt or positioning.

To Replace the Hand Control, follow these steps:

1. Obtain the new Hand Control. (see Parts List, pg. 27)
2. It is recommended that the unit be raised to it’s highest level (use foot control) if possible, for ease of access to the base.
3. Disconnect the table’s power cord from your power outlet before proceeding.

NOTE:
The new electronic component will be reinstalled in the same manner as the old one. When assembling please take note of the order, installation method and placement of plugs as the new unit will be reassembled in the same way.

CAUTION

Before doing any work on the unit, disconnect the power cord from the power outlet.

Be sure to read all cautions, warnings and instructions given in the manual to prevent injury to both operator and client.

DIRECTIONS FOR USE

SIDE ARMRESTS:

Though the arm rests adjust automatically to remain parallel to the floor in any position, there will still be times when you will need to move an arm rest out of the way or remove them altogether. We recommend that you raise the arm rest out of the way to allow a client to get on or off the table. They are designed to be strong and will take a reasonable amount of weight but they are not designed to be used to sustain a person’s weight when getting on or off the table.

To Adjust the Arm Rest:

Before asking a client to mount or dismount from the table we recommend that you move the arm rest out of the way. The arm rests are easy to move and manually adjust. First position the tabletop with the backrest in the upright position and all other section flat. Take hold of the arm rest firmly and raise the arm rest up and out of the way with a steady swing until the arm rest is in the highest upright position (see images below). Hold it in place until your client has mounted (or dismounted) and then actively move it back into the resting position where it will proceed to move automatically with the table top.

The arm rest is now set and will adjust automatically as you position the client for whatever procedure is needed.
There will be times when removal of the arm rests will be needed. This feature is helpful when doing massage or helping someone get on or off the Celesta Maxx™. This can be done easily and storage is conveniently located in the under-table cabinet. They are then right at hand when you are ready to re-install.

To Remove the Arm Rest:
The arm rest frame has a notched connection to the interior of the top which allows it to move automatically when the table top changes position. To remove one or both arm rests just take hold of the base of the arm rest at the metal frame and somewhere on the cushion. Holding securely, rotate the arm rest while at the same time pulling slightly away from the table. You will feel the notched connection slide out as you rotate the arm rest. When you feel this you can then slide the entire arm rest out of the connection hole very easily. Store it safely until ready for installation.

Re-attach the armrest by sliding the arm rest frame into the hole on the tabletop and rotating the it until you feel the notch slip into place. Push it in securely and allow the arm rest to rest in the parallel position. This resets the arm rest in the proper position for the automatic adjustment feature to be activated.

Do not place excess weight on the Side Arm Rests. Do NOT use them in assisting the client on and off the Celesta Maxx™.

Either Arm Rest can be repositioned to allow a client to get on and off the Celesta Maxx™ easily. When making adjustments to the arm rests make certain that the client’s arms are away from the working mechanism.

Electronic Reset Procedure:

Variations in powerline voltage can sometimes confuse the electronics system, resulting in only partial function of the table. A simple reset procedure may correct the problem.

- Lower the table to its lowest position (all the way down — no tilt)
- Lower all top sections to their lowest position. (backrest all the way down, seat section all the way down, foot section to lowest setting)
- Hold each ‘DOWN’ button (one at a time) for 5 seconds.

**NOTE:** if you hit the wrong button and any part of the table moves from its lowest position, then the reset procedure must start over from the beginning, with all all parts in lowest position.

 Removing the Side Arm Rests

If after following the reset procedure the table will still not change height or position then continue to the instructions on the following page.
ACCESSORY OPTIONS

- Locking Castors

CAUTION

Before moving the Celesta Maxx™, disconnect the power cord from the power outlet and secure the electrical cord, hand control and foot controls for moving.

IMPORTANT

Be sure to lock each wheel to ensure safety and stability. Each wheel must also be unlocked individually before moving the equipment.

Be sure to read all cautions, warnings and instructions given in the manual to prevent injury to both operator and client.

The optional Locking Castors make moving your Celesta Maxx™ quick and easy. For the salon or practice that needs the option of moving the Celesta Maxx™ from room to room, this feature ensures that you expend your energy on the client, not the equipment. With the flip of a lever the Celesta Maxx™ moves wherever needed, easing strain and increasing productivity by multiplying availability of use. The rubber stop locks the castor firmly into position making the Celesta Maxx™ stationary again. To lock the castor simply step down on the rubber stop found on each of the wheels. Connect the power, position the foot control and hand control and the Celesta Maxx™ is ready for use.

When you need to move the Celesta Maxx™ just lift up on the rubber stops with your foot and the wheels are unlocked. The Celesta Maxx™ can be moved to its next appointment.

HEAD REST CUSHION:

The Head Rest Cushion is designed to give you comfort and support in a way unique to the Celesta Maxx™. It ensures proper positioning and client comfort while being used, without repeated attempts to find just the right position. Depending on the need, it can be placed high or low to suit the client or removed entirely. Made of a soft foam it offers comfortable support to the client and easy accessibility for effective work no matter what the technique of the practitioner.

The Head Rest Cushion is attached and adjusted to the Celesta Maxx™ by slipping the Velcro® hook and loop strips attached to the cushion through a pair of webbing loops found on the underside of the backrest top. The hook and loop strips attach to themselves and are adjustable to suit positioning needs by lengthening or shortening the length of attachment. Removal is as simple as pulling open the strips and sliding them out of the loops.
**DIRECTIONS FOR USE**

- **QuickLock™ Face Rest**

Double articulating action provides nearly limitless positioning options with the QuickLock™ Face Rest. The adjustable pad takes pressure off sensitive facial areas while providing superb support. The QuickLock™ Face Rest can be used in both prone and supine positioning and folds out of the way when not in use. Adjustments are made easily by loosening the cam locks, adjusting for height and angle and then locking the cam locks into that position.

**ATTACHING THE QUICKLOCK™ FACE REST:**

When attaching the QuickLock™ Face Rest, just slide the frame dowels into the webbing loops, being sure to keep the 1st cam lock within 3” of the table to ensure a stable connection. The recommended length of dowel bracing against the backrest should be at least 2 inches.

To remove the QuickLock™ Face Rest, just pull the frame from the webbing loops until it comes free. Set it safely aside.

**SAFETY NOTE:**

- Do Not extend the dowels of the Face Rest further than 3” from the table edge to ensure a stable connection.

**IMPORTANT**

- Be sure to read all cautions, warnings and instructions given in the manual to prevent injury to both operator and client.

**CAUTION**

- Do not put excessive weight or pressure on the face rest.

---

**QuickLock™ FACE REST: Tips for Great Positioning using the QuickLock™ Face Rest:**

- To use the face rest with your clients supine, rotate the face rest pad so that the thick part of the pad supports your client’s cervical region. Adjusting the height and angle of the face rest gives your clients perfectly comfortable support.

- The face pad is flexible so that you can bring the open ends together or spread them apart to achieve the most comfortable support for any size face. To avoid your client’s chin from hitting the spacebar, make sure the pad is narrow enough to support their whole face.

- For appropriate cervical flexion, use the cam locks to adjust the downward angle of the face rest, making sure that the surface of the face rest pad at the chin is not lower than the surface of the table.
